## **PART II: SELECTION CRITERIA**

Please respond to the following questions. The responses should be clear and concise, with a maximum length of two pages for each question. The selection committee will rely heavily on this information in determining how well the program, project or organization meets the award criteria.

### **Innovation**

Does the product, program or organization involve the use of new technology, approaches or methods superior to standard safety methods and practices? If so, describe this advancement.

### **Achievement**

Describe how the nomination is a significant safety achievement, rather than simply recognition of a company "doing its job".

### **Documentation**

Please provide documentation of the actual or reasonably anticipated tangible results of the nomination. This also may include outside or independent reviews of the nomination.

### **Industry Adaptability**

The nominated product, program or organization should be an inspiration or example to the entire industry. Please explain how this product, program or organization could be translated to other companies or be useful to a wide segment of the industry.
